FOR IMMEDIATE RELEASE

James River Air Conditioning, Richmond, VA Local Richmond, VA HVAC contractor has developed and produced the Richmond/Henrico area's first completed and certified LEED-H Platinum home, Solar Cottage I, (www.solardieahouse.com) renovation. This exciting project was designed to allow clients to actually see, feel, touch and experience the ultimate in practical green strategies. It allows them to view for themselves functioning examples of the strategies deployed to attain peak home efficiency. The following green strategies have been executed on the project: Solar PV power generation, super high efficient heat pump, (24 SEER, 10 HSPF) high performance foam insulation and envelope sealing, Google Power® meter connectivity, TED® KW power monitor, LED lighting, conditioned crawlspace, rain water recovery system, grey water recovery system, low water fixtures, Energy Star appliances, Smart Home controls, ERV ventilation, Merv 13 air filtration, on-site composting, Low E stimulus rated glass, low VOC materials, independent energy testing and EPA Energy Star Rating.

James River Air Conditioning plans to use the house as a test incubator for the mentioned green strategies and proof of the relevance of these strategies. Come see, feel, touch and experience practical green.
